**Seeking possible marketable products leading to Start-Ups initiated with inventions**

Sri Lanka Inventors Commission (SLIC) enacted by Sri Lanka Inventors Incentives act No. 53 of 1979 and currently operative under the purview of the State Ministry of Skills Development, Vocational Education, Research and Innovation, Ministry of Education, offers bundle of services to Sri Lankan inventors through out the journey from brining the innovative idea to a patented prototype, developing to a finished product, finally to the national market and continuing expansion into foreign markets.

Possible marketable products initiated with inventions by postgraduates are sought to facilitate and bring up to the market in order to strengthen the contribution of inventions to the national economy. Those can either be with a potential to be brought up as Start - Ups or which are already in the market but with a potential of enlarging the market share/volume by providing the below facilities delivered by Sri Lanka Inventors Commission as follows;

- Financial assistance for obtaining essential testing, certifications & technical development
- Financial assistance for business growth
- Patent assistance

Hence, appreciate your attention to direct patentable budding products to this programme for establishing innovative culture whilst contributing to the national economy.

Prof. R. U. Halwatura  
Commissioner
